Xi Graphics Releases Linux Graphics Driver for Wildcat¤ III 6110
Accelerated-X™ Summit v2.1 Graphics Driver Supports 3Dlab s Fastest Graphics Card

Denver, Colorado USA ---- Xi Graphics, Inc. announced today the addition of a Wildcat 6110 Linux graphics driver to the Summit v2.1 Workstation Series. The graphics driver is in demo form and can be downloaded from the Xi Graphics Web site, <www.xig.com>, for compatibility and performance testing on Intel/AMD computer platforms running Linux.

The 6110 Linux driver includes dual display and stereo support. Driver benchmarks are posted on the Xi Graphics Web Site. Users can purchase a Summit License Key on-line which when installed converts the demo into permanent product. A license is required for each computer on which an Accelerated-X Summit driver is used as permanent product. The price of the Summit Workstation (WX) Platinum Edition License Key for this driver is $379.

Customer support, which the Company claims is prompt, courteous and competent, is also free via phone and e-mail to its Denver, Colorado facilities.

According to the Company, Xi Graphics is the only source of Linux and Solaris graphics drivers that offer quad-buffered stereo capabilities on a broad range of graphics cards, from low-end cards to the Wildcat¤ line.

About Xi Graphics, Inc.
Xi Graphics, Inc. has developed commercial accelerated graphics drivers for Linux and UNIX¤ systems since 1994, and offers graphics support for a wide range of desktop, laptop, and embedded graphics hardware. For information on the Company, visit www.xig.com.
