Xi Graphics Announces Support for New ATI Radeon VE card
DualView capability allows additional screen space for users

DENVER — Xi Graphics Inc., a seven-year-old private firm that specializes in premium graphics support software for Linux and UNIX systems, announced today the release of driver support for the Radeon VE, the latest in ATI's line of Radeon graphics cards. Support for the Radeon VE is now available as a free downloadable update to owners of the Xi Graphics Accelerated-X v6.

Xi Graphics was the first to develop Linux and Solaris drivers for the highly anticipated Radeon line of cards, announcing support last November for the RADEON™ 32 MB DDR and RADEON™ 64 MB DDR.

"The VE card is the first in the Radeon family that uses the DualView feature," said Jon Trulson, Xi Graphics' engineering manager. "We have directed our engineering efforts to support DualView mode whenever possible in response to the popularity and demand for this feature."

The DualView feature in Single Logical Screen mode splits the output buffer between two monitors, allowing the cursor to drag things across the boundary of the two screens. In Zoom view mode, one monitor can display a small cursor-movable area onto a second screen with a different resolution. The resolution may be "hot-key" switched to change the image size.

A downloadable demo is available at the Xi Graphics Web site at www.xig.com. The new software supports Linux and Solaris 8 for Intel and comes with Xi Graphics' standard Accelerated-X v6 boxed product. The cost is $99.95 and includes free unlimited technical support. Customers may order online via the Web site or toll-free at 1-800-946-7433.

About Xi Graphics Inc.

Xi Graphics Inc., developers of the Accelerated-X Display Server product line, specializes in premium graphics support software for laptop and desktop graphics hardware operated with Linux and UNIX®. Founded in 1994, Xi Graphics is a privately held corporation located in Denver, Colo. The company provides retail products sold direct and through resellers and OEMs worldwide. Products include free customer support via phone and e-mail. For more information, contact Xi Graphics at 800-946-7433 or visit their Web site at www.xig.com.

Xi Graphics is a member of the Video Electronics Standards Association, The Open Group's X Project Team and a member of the Board of Linux International. Xi Graphics' innovative systems software enables Linux and UNIX to run on desktops, laptops and multi-head configurations with 2D and 3D hardware acceleration.
