FOR IMMEDIATE RELEASE**Linux & Solaris Graphics Drivers Available for Panasonic ToughBooks**

Xi Graphics, Inc. releases Summit graphics for two ToughBook models

DENVER, February 27, 2003 ---- Xi Graphics, Inc. announced today that it has released Accelerated-X™ Summit v2.2 graphics drivers for ToughBook models CF-28 and CF-72 running Linux or Solaris (on Intel). A total of five drivers are available for both Linux and Solaris (on Intel) for each unit, including OpenGL drivers and drivers that support the embedded touch panel (touch screen) hardware in each notebook.

Each Summit v2.2 graphics driver is available in demo mode for download from the Xi Graphics Web site for compatibility and performance testing. Users can purchase a Summit License Key on-line which, when installed, converts a demo into permanent product. A license is required for each computer on which an Accelerated-X Summit driver is used as permanent product. Prices for the Summit Laptop License Keys range from \$99 to \$199, depending upon the driver. Quantity discounts are available.

Customer support, which the Company claims is prompt, courteous and competent, is also free via phone and e-mail to its Denver, Colorado facilities.

About Xi Graphics, Inc.

Xi Graphics, Inc. has developed commercial accelerated graphics drivers and X servers for the X Window System on Linux and UNIX® systems since 1994. For information on the Company, visit www.xig.com.
