FOR IMMEDIATE RELEASE**Linux & Solaris Graphics Drivers Available for Sager Notebooks**

Xi Graphics, Inc. releases Summit graphics for two "portable workstation" models

DENVER, March 3, 2003 ---- Xi Graphics, Inc. announced today that it has released Accelerated-X™ Summit v2.2 graphics drivers for Sager models NP5660 and NP8886 notebooks running Linux or Solaris (on Intel). A total of four drivers are available for both Linux and Solaris (on Intel) for each unit, including OpenGL drivers.

Both the NP5660 and NP8886 models are billed by Sager as portable workstations, since they contain exceptionally fast graphics, Intel Pentium 4 processors up to 2.8 GHz, 15" and 15.7" displays, respectively, and are available with up to 1 GB of memory and lots of I/O capabilities. Graphics performance figures for each notebook for both 2D and OpenGL rendering are available on Xi Graphics' Web site - www.xig.com.

Each Summit v2.2 graphics driver is available in demo mode for download from the Xi Graphics Web site for compatibility and performance testing. Users can purchase a Summit License Key on-line which, when installed, converts a demo into permanent product. A license is required for each computer on which an Accelerated-X Summit driver is used as permanent product. Prices for the Summit Laptop License Keys range from \$99 to \$179, depending upon the driver. Quantity discounts are available.

Customer support, which the Company claims is prompt, courteous and competent, is also free via phone and e-mail to its Denver, Colorado facilities.

About Xi Graphics, Inc.

Xi Graphics, Inc. has developed commercial accelerated graphics drivers and X servers for the X Window System on Linux and UNIX® systems since 1994. For information on the Company, visit www.xig.com.
