**FOR IMMEDIATE RELEASE****Linux Graphics Drivers Available for Dell Inspiron 8200 Notebook**

*Xi Graphics, Inc. releases set of drivers for Mobility RADEON 9000 graphics*

DENVER, November 20, 2002 ---- Xi Graphics, Inc. announced today that it has released Linux and Solaris (on Intel) graphics drivers for the Dell Inspiron 8200 notebook that uses the ATI Mobility RADEON 9000 graphics chip. Four drivers are available each for Linux and Solaris (on Intel), including high-performance OpenGL drivers, for this Dell notebook,

Additionally, the Company also released a set of "generic" graphics drivers that can be used with other laptops that utilize the Mobility RADEON 9000 graphics chip, such as the high-end Sager NP8886.

Each Summit v2.2 graphics driver is available in demo mode for download from the Xi Graphics Web site for compatibility and performance testing. Users can purchase a Summit License Key on-line which, when installed, converts a demo into permanent product. A license is required for each computer on which an Accelerated-X Summit driver is used as permanent product. Prices for the Summit Laptop License Keys range from \$99 to \$179, depending upon the driver.

Quantity discounts are available.

Customer support, which the Company claims is prompt, courteous and competent, is also free via phone and e-mail to its Denver, Colorado facilities.
