FOR IMMEDIATE RELEASE**Xi Graphics Has New Linux/UNIX[®] Drivers for Advantech PCM-9372 SBC**

Support for VIA Eden-based Single Board Computer includes OpenGL and LCD display.

DENVER, September 24, 2003 ---- Xi Graphics, Inc. announced today that it has released high-performance 2D and OpenGL 3D Accelerated-X™ Summit Series commercial-off-the-shelf graphics drivers that support the 3.5" Advantech PCM-9372 card on Linux or Solaris (on Intel) operating systems. The Summit graphics drivers provide optimized support for the VIA Technologies, Inc. C3 Eden processor with S3 ProSavage 3D graphics hardware, including support for the MMX and 3D Now! instructions in the C3 CPU.

The new software support was developed by Xi Graphics with the cooperation of VIA Technologies, and tested on a 400 MHz (CPU) version of the Advantech product. Full-function demos of Summit v2.2 Series of X servers and graphics drivers for use with the X Window System used by Linux and UNIX operating systems are available for free downloading and testing from Xi Graphics' Web site. License Keys to convert the Summit v2.2 demos to permanent product can be purchased on-line or through normal purchasing modes.

Summit v2.2 products support the latest Linux releases from RedHat, S.u.S.E., Mandrake, Slackware, etc., as well as versions 8 and 9 of Solaris (on Intel).

A license is required for each computer on which an Accelerated-X Summit driver is used as permanent product. Prices for Summit Series License Keys for the Advantech PCM-9372 range from \$69, depending upon the driver. Quantity discounts are available.

Customer support, which the Company claims is prompt, courteous and competent, is also free via phone and e-mail to its Denver, Colorado facilities.

About Xi Graphics, Inc.

Xi Graphics, Inc. has developed commercial accelerated graphics drivers and X servers for the X Window System on Linux and UNIX® systems since 1994. For information on the Company, visit www.xig.com.
