Xi Graphics Releases Graphics Drivers For Appian Rushmore™ Graphics Card
Accelerated-X™ Summit v2.1 Multi-head (MX) support available for Linux and Solaris

Denver, Colorado USA ---- Xi Graphics, Inc. announced today the release of eight high-performance Summit v2.1 graphics drivers for the multi-head Rushmore card that uses two ATI RADEON VE graphics chips. The drivers differ in feature sets, operating system requirements, and in 2D or 2D+OpenGL 3D capabilities. Each driver is available in demo mode for download from the Xi Graphics Web site, www.xig.com, for compatibility and performance testing on multi-head and/or multi-card computer systems. Support for up to 16 displays is available in some of the driver products.

Users can purchase a Summit License Key on-line which when installed converts a multi-head demo into permanent product. A license is required for each computer on which an Accelerated-X Multi-head (MX) Summit driver is used as permanent product. Prices for the License Keys range from \$129 to \$249 each, depending upon the driver. Quantity discounts are available.

Customer support, which the Company claims is prompt, courteous and competent, is also free via phone and e-mail to its Denver, Colorado facilities.

Performance benchmarks for this and other multi-head cards supported by the Xi Graphics s Summit Multi-head (MX) Series are available on the Xi Graphics Web site, www.xig.com.

About Xi Graphics, Inc.

Xi Graphics, Inc. has developed commercial accelerated graphics drivers for Linux and UNIX® systems since 1994, and offers graphics support for a wide range of desktop, laptop, and embedded graphics hardware. For information on the Company, visit www.xig.com.
